MRO与工业备件 INDUSTRIAL SUPPLIES & TOOLS

- Multi-brand coverage
- Metric/imperial specifications
- Documents support
- Authentic products
- Broad capability, stable and efficient

合作优势 PARTNER ADVANTAGES

Shop with Confidence: 100% factory-authorized with full warranty.

Stable Supply: China and U.S. warehouses with fixed monthly shipments.

Technical Support: Our experts can help you select a product and provide application support.

Reduced Complexity: One-stop procurement platform to simplify supply chain management

Local Service: Fast response to customer needs with localized support.

核心服务与支持能力

Our Support Services

Shanghai Motion Control Technology (MCT) combines its local expertise with Eastern Industrial Automation's global support and engineering network to offer seamless, end-to-end services. From product procurement and technical selection to inventory management and after-sales support, we handle the complexities of your supply chain. By reducing equipment downtime and streamlining procurement, we empower you to focus on what matters most: growing your business.

Manufacturer Authorized Products:

Partnering with leading US and European industrial brands to provide comprehensive, multi-category procurement and supply chain integration.

Procurement Support:

Providing product cross-referencing, application consultation, and dedicated engineering support.

Inventory & Delivery Coordination:

We utilize our global supply network to ensure reliable supply continuity and rapid response times for your operations.

MRO Spare Parts Support:

Supporting maintenance spare parts replenishment and procurement of hard-to-find items across multiple channels.

Import & Documentation Support:

Coordinating custom's documents, test certificates, certificates of origin, and related technical documents.

Local Service Response:

Quickly responding to our customer's needs with efficient communication and project follow-up.

服务流程

Our Process

Requirement Confirmation:

Work closely with our customers to understand their objectives and establish a comprehensive set of technical requirements for their application.

Technical Selection:

Recommend the most cost effective products and develop customized solutions that align with the application's technical requirements and performance objectives.

Quotation & Lead Time:

Provide accurate pricing and realistic delivery timelines to ensure transparency, reliability, and effective project planning.

Procurement & Delivery:

Coordinate global sourcing, procurement, and logistics operations to ensure products are delivered on time and according to schedule.

After-Sales Support:

From implementation to ongoing operation, our professional team is committed to providing reliable technical support and exceptional after-sales service every step of the way.
